

Four easy-step start-up procedures for our new Raven smoker**

***Before you start using the smoker, please familiarize yourself with the component diagram at the back side of this page.

Step 1

Load the Feeder Tube

- Open the door
- Remove the feeder tube and load it with the desired Bradley Flavored Bisquettes®
- Reinstall the loaded feeder tube
- Close the door

Step 2

Fill Water Tray

- Pull out the water tray from the bottom of the smoker (see Fig. 1)
- Fill the water tray with water up to the indicated level lines
- Insert the renderings tray on top of the water tray and slide to the back
- Slide them both under the smoker till they both reach the backstop.
 - (ensure the renderings tray is lined at the back of the water tray)

Step 3

Connect the Smoker to Power

- Insert the power cord
- Turn the Power Switch ON (switch located on the back of the smoker. (see Fig.2)
Note – the power switch at the back of the smoker and the power indicator on the door will be lit red.

Step 4

Program your Smoker

- To start programming your smoker touch the gray power switch 
- Change the operating temperature by touching the F/C Unit Exchange Switch 
- Select your cook temperature,
 - touch the temperature icon and use the up and down arrow icons to adjust the setting.  + 
- Select your preferred cook time
 - touch the clock icon and use the up and down arrows icon to adjust the setting.  + 
- Choose the smoke intensity 20-30-40 by touching the icon 
- Adjust the smoke time
 - touch the smoke icon and use the up and down arrows icon to adjust the setting.  + 

A side note:

To deactivate the child lock simultaneously press both arrow icons for 1 second

Temperature adjustment range is between 30-160C / 80-320F

When the outside operating temperature is below -10C / 14F the word COLD will be displayed and no operations shall be conducted until the temperature warms up

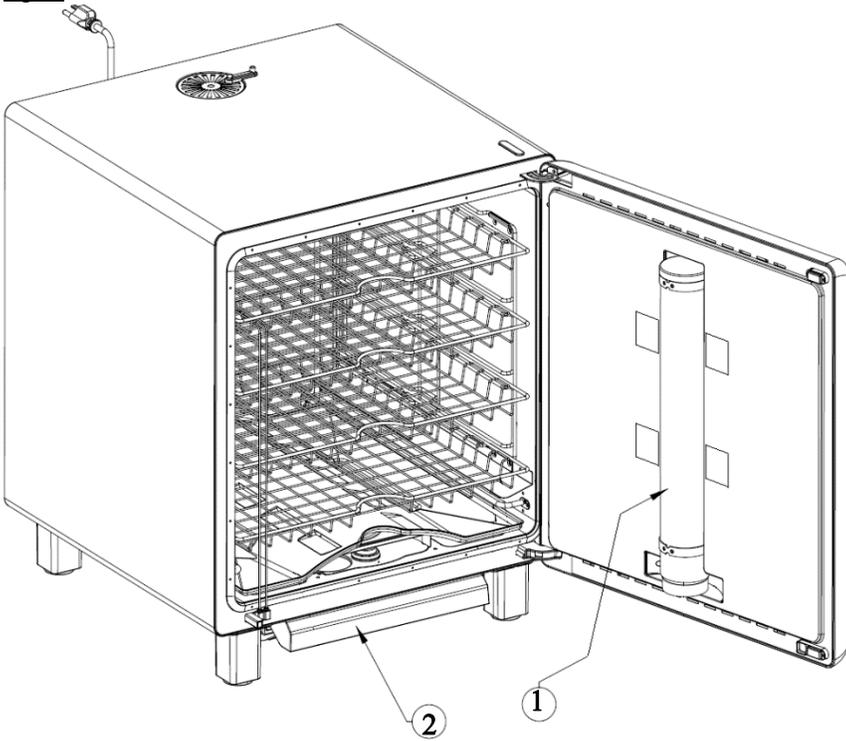

**For in-depth display functions please refer the manual p.14

Once you've completed all four steps, you're good to go.

Happy Smoking!
